Trans. of Kinetika i Kataliz (USSR) 1960, v. 1, no. 1, p. 83-94.

DESCRIPTORS: *Adsorption, *Catalysts, Semiconductors, Impurities, *Gases, *Reaction kinetics.

Gas adsorption on semiconductor and metallic catalysts was studied by an isotopic tracer method. Changes in heat and activation energy of adsorption are discussed in the light of the electronic theory of chemisorption. It is concluded that inhomogeneity of the active surface is the main reason for the change in heats and activation (Chemistry--Physical, TT, v. 6, no. 10) (over)
